

DESPERATE HOUSECAT BERNIE 14019

Due to a family emergency, **BERNIE** was brought to AAS. This **super social** guy would **LOVE** to spend time outdoors, so if you have a catio, he's already your best friend. 😊 His previous owner described **BERNIE** as **quirky, funny, cuddly, and playful**. He is easily picked up and held, and is a lap cat if you put him there. He'll follow you around, wants to be near you, and will sleep with you at night. **BERNIE** is **serious about mealtime** – he'll look you straight in the eye and knock things over if you don't feed him quickly enough. A covered litterbox is best for him, as he likes to drag items into an open one. **BERNIE** will be a **great addition** to almost any household (slow introductions with resident cats and dogs).
